

# Rainer Brieger

Calgary, AB | [hello@rainerb.com](mailto:hello@rainerb.com) | 403-835-3058  
GitHub: [github.com/rainerb16](https://github.com/rainerb16) | Portfolio: [rainerb.com](https://rainerb.com)

---

## Professional Summary

**Full-stack developer** building clean, responsive interfaces with **JavaScript**, **Vue (Basic level)** and **React**, with hands-on experience integrating **Node.js** and **Express REST APIs**. Strong foundation in component-based UI development, debugging, and maintainable styling. Brings ownership, attention to detail, and clear communication from process-heavy environments into application development.

---

## Technical Skills

**Frontend:** JavaScript (ES6+), Vue (basic level), React, HTML5, CSS3

**Backend:** Node.js, Express (REST APIs, CRUD)

**Styling:** Sass (SCSS), Tailwind, Responsive Layouts

**Tools:** Git & GitHub, Browser DevTools, Netlify, Contentful, Jira

---

## Professional Experience

### Evans Hunt Group — Developer

Calgary, AB | 2020–2023

- Developed and maintained frontend features using React within a component-based architecture
- Built reusable components and implemented UI enhancements from tickets and stakeholder feedback
- Debugged layout, styling, and functional issues across browsers and devices
- Collaborated with designers, developers, and project managers in an agile workflow
- Contributed frontend work to client projects including **Calgary Stampede**, **United Way**, **Ikon Pass**, **CMH Heli-Skiing**, and **Alterra**

### City Electric Supply — Project Quotations

Calgary, AB | 2025–Present

- Worked within complex, data-driven systems requiring high accuracy and consistency

- Translated technical documentation into precise, actionable outputs under deadlines
- 

## Projects

### **Portfolio Website (Vue)** — rainerb.com

*Vue, Vue Router, Sass, Netlify*

- Designed a clear information hierarchy for projects, resume, and contact flows
- Built reusable components and responsive layouts using SCSS

### **Dev.Techno Blog (React + CMS)** — devtechno.netlify.app

*React, Contentful, Netlify*

- Integrated Contentful as a headless CMS to dynamically render structured content
- Built reusable React components and handled async data loading

### **Tiny Tasks (React + Node.js)** — tiny-tasks-rainer.netlify.app

*React, Sass, Node.js, Express, REST API, Netlify, Render*

*(Live demo may take up to 60s on first load due to free-tier hosting)*

- Built a REST API using Node.js and Express to support task CRUD operations
  - Developed a separate frontend client that consumes the API via environment-based endpoints
  - Implemented loading, empty, and error states to reflect real client–server behavior
- 

## Education

Web Development Certificate — Innotech College

Business Administration Diploma — SAIT Polytechnic
