

# Rainer Brieger

*Fullstack Developer*

Calgary, AB | [hello@rainerb.com](mailto:hello@rainerb.com) | 403-835-3058  
GitHub: [github.com/rainerb16](https://github.com/rainerb16) | Portfolio: [rainerb.com/#/portfolio](https://rainerb.com/#/portfolio)

---

## Professional Summary

**Full-stack developer** focused on building clean, responsive web applications with **JavaScript** and **React**. Works across the stack with **Node.js**, **Express**, **PostgreSQL**, and **REST APIs**, and has experience deploying applications with **CI/CD** pipelines. Brings a background in detail-driven environments, emphasizing ownership, clarity, and reliable execution.

---

## Technical Skills

**Frontend:** JavaScript (ES6+), React, HTML5, CSS3, SASS (SCSS), Responsive UI Development

**Backend:** Node.js, Express, REST APIs, CRUD Operations, Session-Based Authentication

**Databases:** PostgreSQL, SQL (schema design, queries)

**Styling:** Sass (SCSS), Tailwind, Responsive Layouts, Component-Based Layouts

**DevOps & Deployment:** CI/CD Pipelines, Environment Variables, Netlify, Render

**Tools:** Git & GitHub, Browser DevTools, Jira

---

## Professional Experience

### Evans Hunt Group — Developer

Calgary, AB | 2020–2023

- Developed and maintained frontend features using React within a component-based architecture
- Built reusable components and implemented UI enhancements from tickets and stakeholder feedback
- Debugged layout, styling, and functional issues across browsers and devices
- Collaborated with designers, developers, and project managers in an agile workflow
- Contributed frontend work to client projects including **Calgary Stampede**, **United Way**, **Ikon Pass**, **CMH Heli-Skiing**, and **Alterra**

## City Electric Supply — Project Quotations

Calgary, AB | 2025–Present

- Worked within complex, data-driven systems requiring high accuracy and consistency
  - Translated technical documentation into precise, actionable outputs under deadlines
- 

## Projects

### Inventory Management Dashboard

*React, Node.js, Express, PostgreSQL, CI/CD, REST APIs*

Frontend: <https://github.com/rainerb16/inventory-web>

Backend: <https://github.com/rainerb16/inventory-api>

- Built a full-stack inventory management application with a React frontend and Node/Express API, backed by PostgreSQL for persistent data storage. Designed RESTful endpoints supporting CRUD operations, server-side validation, and error handling.
- Implemented relational database schema and SQL queries to manage inventory items and metadata.
- Added session-based authentication and protected routes for authenticated access.
- Deployed frontend and backend separately with environment-based configuration and automated CI/CD pipelines.

### Portfolio Website (Vue) — <https://rainerb.com>

*Vue, Vue Router, Sass, Netlify*

- Designed a clear information hierarchy for projects, resume, and contact flows
- Built reusable components and responsive layouts using SCSS

### Dev.Techno Blog (React + CMS) — <https://devtechno.netlify.app>

*React, Contentful, Netlify*

- Integrated Contentful as a headless CMS to dynamically render structured content
  - Built reusable React components and handled async data loading
- 

## Education

Fullstack Development Diploma — Innotech College

Business Administration Diploma — SAIT Polytechnic
